Elite Aviation Products Poised to Capitalize on Positive Trends in U.S. Aerospace Market

Irvine, California March 23, 2015 – The United States is clearly rebounding as the global hot spot for aerospace investment. Possessing nearly half of the \$530 Billion worldwide industry and more than \$25 Billion in investments between 2012 and 2013, all signs are pointing up for the young and voraciously growing Elite Aviation Products.

“It is absolutely unbelievable the amount of growth we continue to see in this sector, particularly in the domestic market,” Zeeshawn Zia, COO of Elite Aviation Products commented, “By tailoring our business model with the utmost efficiency in mind and utilizing the most advanced technologies, we are not worried about facing the same constraints many of our competitors are currently experiencing.”

In line with the boom the aerospace market has experienced over the past several years, the administration’s new defense budget continues that trend in a huge way. The Pentagon is upping its buy of F35 Joint Strike Fighters from 38 this year to 57 in 2016; Lockheed Martin is poised to gross \$10.6 billion for the fifth generation fighter jets. Sixteen P8 Poseidon maritime patrol aircraft will net Boeing \$3.4 billion alongside the \$3 billion the aircraft maker will receive to continue developing the Air Force’s next generation KC46.

“The work we spoke about at inception, what we could only refer to as an avalanche continues to become that much more ominous to the competition, and awe-inspiring to us,” Stated CEO of Elite, Dustin Tillman, “Programs and opportunities that we could have never conceived of when we first got started are now a part of that growth trajectory. Make no mistake, while commercial aviation will serve as our staple, the parts we will make belong in the upper echelons of our atmosphere and beyond. That’s where our sights are set! Announcements from the Air Force and the Pentagon about multi-billion dollar programs over the next several years only protects and enhances our projections.”

About Elite Aviation Products EAP is an advanced design, engineering, and manufacturing company within the aerospace industry. Elite represents a consortium of talented professionals who are passionately committed to providing the highest level of customer service and quality, while delivering cost-competitive supply availability solutions. EAP was formed by senior aviation officials who, tired of their expectations not being met, set out on a campaign for change; challenging conventionality in the marketplace and driving customer-centric part supply strategies. Elite is a proud contributor to the reshoring initiatives, focused on bringing manufacturing back to the United States. EAP’s focus on its core values and commitment to excellence has made the company an attractive, competitive standout to consumers and investors alike.
