Elite Aviation Products Achieves ISO9001 and AS9100 Certifications, Industry Gold Standard

Irvine, California May 27, 2015 –Elite Aviation Products is proud to announce it is officially an ISO9001 and AS9100 rev. C certified company.

The AS9100 rev. C designation is considered the aerospace industry gold standard for quality assurance, offered only to organizations that develop and produce aviation, space and defense products while demonstrating strict adherence to quality, reliability and safety standards. It ensures that the company has passed rigorous evaluations of its manufacturing processes to achieve the standard of quality required. Whereas achieving this designation commonly takes years to achieve, Elite earned this gold standard for quality assurance in only a matter of months in its push to become the industry's leader in component manufacturing.

“The fact that we were able to complete the ISO9001 and AS9100 certification processes in such a short period of time is a testament to the team we have assembled here, and our abundant commitment to quality,” said Dustin Tillman, CEO of Elite Aviation Products, “It’s a remarkable feat for any organization to achieve this tremendous milestone let alone a young company like ours whose presence in the marketplace is just taking hold. Ultimately this achievement proves to the industry how serious we are about being number 1.”

This type of certification will allow EAP to enter into an entirely new realm of possibilities. All of the largest OEMs and first-tier manufacturers currently, or will, require their suppliers to be AS9100 certified. Moreover, all major Aerospace regulators including the Federal Aviation Administration (FAA), U.S. Department of Defense (DoD) and the National Aerospace and Space Administration (NASA) endorse the current version of AS9100, Revision C. By reaching this pivotal milestone, Elite will be able to compete with some of the biggest players in the industry.

“This is a huge moment for our company,” stated COO, Zeeshawn Zia, “All of our efforts assembling the incredible team we have, securing the most advanced technology—they wouldn’t shine quite as bright unless we were able to go out there and secure the biggest players in the industry as clients. Now we can.”

About Elite Aviation Products EAP is an advanced design, engineering, and manufacturing company within the aerospace industry. Elite represents a consortium of talented professionals who are passionately committed to providing the highest level of customer service and quality, while delivering cost-competitive supply availability solutions. EAP was formed by senior aviation officials who, tired of their expectations not being met, set out on a campaign for change; challenging conventionality in the marketplace and driving customer-centric part supply strategies. Elite is a proud contributor to the reshoring initiatives, focused on bringing manufacturing back to the United States. EAP's focus on its core values and commitment to excellence has made the company an attractive, competitive standout to consumers and investors alike. **For more information, please call us at (949)783-7067 or visit us online at www.EliteAviationProducts.com**
