### **Elite Aviation Products Featured on Fox Business Network, Rapidly Changing the Face of Aviation**

**Irvine, California July 30, 2015** – On Saturday, July 18<sup>th</sup>, 2015, Elite Aviation Products was featured on the Fox Business Network in a brief segment on the booming aerospace market. This segment aired as part of the Talk Business 360 program and explained the changes and major increase in demands within the aerospace industry. Fox Business Network has previously featured companies like Boeing, General Atomics, and other leading companies in the aviation industry.

As Dustin Tillman, CEO of Elite Aviation Products, stated, “The industry is going through a major transformation and is demanding so much more of their suppliers.” He went on to say, “Elite Aviation Products is committed to providing cost competitive, quality manufacturing, and customer centric solutions, key features that are surprisingly absent in the current marketplace.”

As Elite Aviation Products continues to build a strong foundation, not only will they be sufficiently equipped to handle the more abundant volume of work, but given the range of machines they have acquired, EAP will be furnished to venture into more complex and diversified product lines than their competition.

Air travel remains a large and growing industry, and is directly responsible for the facilitation of economic growth, world trade, international investments, and tourism. According to the Society of Manufacturing Engineers, the global aerospace and defense manufacturing industry is valued at \$170 billion annually, and is roughly divided into five sub-categories: military, civil, space, related products & services, and missiles. Elite Aviation Products’ business plan calls for the aggressive infiltration of each of these categorical opportunities as it executes its robust sales and marketing strategy.

**About Elite Aviation Products** EAP is an advanced design, engineering, and manufacturing company within the aerospace industry. Elite represents a consortium of talented professionals who are passionately committed to providing the highest level of customer service and quality, while delivering cost-competitive supply availability solutions. EAP was formed by senior aviation officials who, tired of their expectations not being met, set out on a campaign for change; challenging conventionality in the marketplace and driving customer-centric part supply strategies. Elite is a proud contributor to the reshoring initiatives, focused on bringing manufacturing back to the United States. EAP’s focus on its core values and commitment to excellence has made the company an attractive, competitive standout to consumers and investors alike. **For more information, please call us at (949)783-7067 or visit us online at [www.EliteAviationProducts.com](http://www.EliteAviationProducts.com)**
